## COURSE CONTENT

### Roles and Responsibilities

Understand the responsibilities of those administering medication, along with an overview of the different types of medications and the "7 Rights" of medication administration.

### Administering Medication

Learn correct techniques, through practical demonstrations, to administer various forms of medication, including liquids, eye and ear drops, patches, nebulisers, puffers, creams, and sprays.

### Safety and Compliance

Review key topics such as medication expiry dates, accurate labelling, correct use of PPE, and safe storage practices for medications, including Schedule 8 (S8) drugs.

### Documentation and Reporting

Gain a thorough understanding of the importance of correct documentation, handling Pro Re Nata (as-needed) medication, identifying drug interactions, and following procedures in case of adverse effects or emergencies.

### Interactive Discussions and Practical Application

Engage in group discussions to share best practices for medication routines in real-world care settings. Hands-on practice sessions will solidify understanding and build confidence in medication administration.

# Medication Management

## LEARNING OUTCOMES

By the end of the course, participants will be able to:

- Administer medications safely, with confidence and competence
- Handle medication schedules
- Respond effectively in situations of adverse effects or emergencies
- Document and report on the management of medication
- Ensure a high standard of care to the well-being and safety of their clients

## SUITABILITY

Suitable for healthcare professionals, caregivers, and support staff involved in the administering or assisting of medications in various care environments.

## DURATION AND FORMAT
